**N at the bottom** indicates the number of records that are included in the average/standard deviation calculations for that questions. There are a few reasons why a response would not be included in the average/standard deviation calculations, most of which are explained below.

**[N]*, in grey** indicates a null answer, i.e., the student did not choose a response for this question (note that this is different than choosing an NA response, if one exist - NA responses usually do not stamp a null, but rather a non-calculated value - see below). Null answers are not included in average/standard deviation calculations.

**Values in red** are not bounded by the question response set and are problematic. For example, if

you had a value of "7" in a question that was attached to a response set with values 0-6, the value would be considered unbounded. Technically, this should never be possible unless there is a problem in the original source of data (i.e., an impossible value got stamped into the record), but the system flags the condition if it is encountered. Unbounded values are not calculated in averages/standard deviation.

**Values in orange** indicate a response set value which has been designated as not calculated. Typically, if a response set has an NA choice, it will fall into this category. These values will not be included in the average/standard deviation calculations.

**Averages and Standard Deviation** are only calculated for values bounded within the question response set and specified as calculated. For instance, if you had a response set with values 1=Good 2=neutral 3=poor and 4=NA, and you specified that the 4 value should NOT be calculated, then the only values that would be included in the average and standard dev calculations would be 1, 2 and 3. Other values (NULL, non calculated values like 4, or unbounded values like ? or 8) would NOT be included in calculations or in the determination of "n".

## COMMENT / SHORT ANSWER DETAIL

| Student 1 (Submission id = 146135) | | |
|---|---|---|
| 15 | In terms of your learning, what were the best aspects of this course? | She used current-real world scenarios to help make economics easier for students to understand. |
| 16 | What specific, practical changes can you recommend that might improve learning in this course? | If she posted the grades in moodle so students knew their current grade overall. |
| 17 | If a good friend asked whether you would | The course itself is challenging but the professor made it more fun to follow along in class. |

| | | |
|---|---|---|
| | recommend this course from this instructor, what would you say? Why? | |

**Student 2 (Submission id = 147697)**

| 15 | In terms of your learning, what were the best aspects of this course? | |
|---|---|---|
| 16 | What specific, practical changes can you recommend that might improve learning in this course? | |
| 17 | If a good friend asked whether you would recommend this course from this instructor, what would you say? Why? | |

**Student 3 (Submission id = 147739)**

| 15 | In terms of your learning, what were the best aspects of this course? | how we can do homework at our own pace |
|---|---|---|
| 16 | What specific, practical changes can you recommend that might improve learning in this course? | longer test time window |
| 17 | If a good friend asked whether you would recommend this course from this instructor, what would you say? Why? | maybe if you miss something the professor is not lenient at all |

**Student 4 (Submission id = 147758)**

| 15 | In terms of your learning, what were the best aspects of this course? | Professor held my interest with polling questions |
|---|---|---|
| 16 | What specific, practical changes can you recommend that might improve learning in this course? | Too many topics covered per test. Maybe four tests instead of three? |
| 17 | If a good friend asked whether you would | Yes! She was very clear with her explanations! Taught the topics extremely well! |

| | | recommend this course from this instructor, what would you say? Why? | |
|---|---|---|---|

**Student 5 (Submission id = 148127)**

| 15 | In terms of your learning, what were the best aspects of this course? | The best aspects of this course are how organized the material is. It makes it much easier to stomach and grasp the concepts. |
|---|---|---|
| 16 | What specific, practical changes can you recommend that might improve learning in this course? | I would say enhanced study materials and posting Zoom recordings would definitely improve the course. |
| 17 | If a good friend asked whether you would recommend this course from this instructor, what would you say? Why? | I would recommend that they take this course with this instructor because she is awesome and very passionate about microeconomics and teaching the course. However, I would also tell them that this course is challenging if economics isn't a strong suit for you. |
